## ALLIES IN WAR WILL BE ALLIES IN PEACE

## CHANGE IN TARIFF SYSTEM IS NEEDED TO PROTECT AMERICAN TRADE

(By Associated Press.)

NEW ORLEANS, Jan. 29.—That the European allies of war will become economic allies in peace and adopt preferential tariff policies to help each other discharge war indebtedness and extend foreign trade and that the United States tariff system should be rendered more flexible to extend American trade and protect it from discrimination, were the conclusions voiced by Willard Straight, vice-president of the American International Corporation, of New York, the new \$50,000,000 organization for intensive development of overseas commerce, in an address before the National Foreign Trade commission here last night.

Quoting the recent declaration in parliament of Walter Runciman, president of the British board of trade, that the British Empire must help France, Russia, Italy and her other allies to recuperate from the war and that nothing in German post-bellum policy be permitted to interfere, Mr. Straight said:

"The speech, it is true, was directed against Germany, but it disclosed a point of view with which we in the United States may have to reckon.

"A tariff agreement between the United Kingdom and the British colonies and special concessions under the scheme of Imperial preference as part of a general reciprocal arrangement between France, Russia, Italy and Belgium and their various dependencies, would create an entirely self-supporting commercial unit which would cover a well balanced exchange of raw products for manufactured articles. On the other hand, economists of the Teutonic alliance are actively considering the intensive commercial policies necessary to regain accustomed foreign sources of wealth and to

prevent blighting discrimination.

"Three-fifths of the imports into the United States enter duty free. Our producers are competing with British, French and German manufacturers in various overseas markets, yet in placing many of the products of these markets on our free list, we obtain no compensatory preferential rates for articles which we, in turn, wish them to purchase from us.

"It might be well if the president were given power, upon the recommendation of the tariff commission, to impose by proclamation an increase of duties, limited, say, to 15 per cent of the present duties on any or all of the products imported from any country which, in his judgment, unduly discriminates against American products.

"An alternative suggestion is the establishment of a dual or conventional tariff system with one general schedule from which concessions to a lower level on specified articles might be extended to countries affording the United States reciprocal treatment. This is a conciliatory method, but it is doubtful if it can be employed under any tariff system which places upon the free list, without any return whatever, a large range of the products of the countries which are the natural consumers of American products."

## VERDI MILL BUSY

The lumber mill of the Verdi Lumber company has put through a large number of orders during the winter season, but the recent storms have forced the mills to cease operation of a short time. Plans are ready for the resumption of activities on a larger scale, in order to catch up on the unfilled orders, accumulating during the shut-down. Over 100 carload lots are awaiting shipment.

## CATTLE THIEVES

Requisition papers were received at the governor's office yesterday for the return of Frank Dawson and Tom Taylor, who are wanted in Arizona for cattle stealing. The men were arrested at Caliente, Nevada.

## COLLEGE COURSE FOR DISABLED OFFICERS

## TO FIT THEM FOR USEFULNESS IN OTHER WALKS OF LIFE

(By Associated Press.)

BERLIN, Jan. 29.—College courses for officers disabled through wounds or campaign hardships are now being offered, a start having been made by the Technological Institute at Dantzig. The object of the courses is to fit officers who have been obliged to abandon their army careers through disability for positions as mayors in the smaller cities, higher officials in municipal bureaus, and other administrative posts which in Germany require a certain amount of preliminary theoretical education, and business positions generally. The sources of instruction include civil and administrative law, economics, banking, theory of insurance, statistics, commercial branches, languages and many other subjects which the embryo business man, or municipal official would find useful in his future career. A course of study covering four to five months and including five hours instruction daily is contemplated, tuition being free for veteran officers and for non-commissioned officers and men as have the necessary preliminary education and social standing for such posts.

## BODIE IS SNOW-BOUND

Some six feet of snow on the level has Bodie completely snowbound. The mail is being brought in from the Aurora section at frequent intervals although a hard effort is being made to open the road by C. B. Burkham who has the mail contracts in this section. There are a few men at work leasing at the Standard mine. The recent find of Kelly and Bell in the old Bodie mine is producing large quantities of high grade ore and they will undoubtedly make a fortune from their lease.—News.

## RABID COW IN RENO

Probably the first case of the rabies to be discovered in Reno has been reported to the university, where the head of a cow that began to show symptoms was sent for examination. The case was pronounced to be one of rabies without any doubt, and it is known now that the plague has reached there.
